

COVER LETTER

We would like to formally offer for your consideration the purchase of an HFO fired boiler, comprising the following unit:

- One (1) × 3 t/hr John Thompson boiler fitted with a Riello P300 T/N burner and standard John Thompson control system

Boiler will be supplied fully refurbished and prepared for reliable and efficient operation. The refurbishment scope will include a complete overhaul of all associated valves and control systems, new lagging and cladding, and a full chemical clean of the waterside.

Comprehensive documentation will be provided, including records of any past repairs (where applicable), as well as the most recent three-yearly and annual inspection reports.

Should it be of interest, we are also able to upgrade or modify the boiler control systems to align with your preferred platform or operational requirements, allowing for improved ease of use, integration, and long-term supportability.

We believe this offering represents a robust, well-documented boiler solution and would welcome the opportunity to discuss technical details, lead times, and commercial terms with you at your convenience.

Please do not hesitate to contact me should you require any further information.

Regards,

Bruce Ferreira
